166 of the 1305 women screened at mobile sites in the region in 2012 were 70 years of age or over

RHA Screening Participation Rates

- Screening rates for women 50-69 years of age

The Program's goal is to screen 70% of the population of women 50-69 years of age every 2 years.

It takes the effort of the entire community to make mobile screening a success. Here are some of the regional highlights for 2012:

- Compared to 2010:
 - Regional breast screening rates decreased by **2%** (59% to 57%).
 - The population of women 50 to 69 years of age increased by **50 women** (4971 in 2010 to 5021 in 2013).
 - BreastCheck screened **66** fewer women 50 to 69 years of age (2922 in 2010 to 2856 in 2012)
 - The following communities (with 50 or more women ages 50-69) increased their screening rates by 5% or more:
 - Winnipegosis
- BreastCheck encourages community organized group trips to help local women get to the closest screening site. In 2012 the following communities participated:
 - Sapotaweyak Cree Nation
 - Wuskwi Sipihk First Nation
- Equipment and staffing issues impacted the number of appointments offered at many sites
