177 of the 1863 women screened at mobile sites in the city in 2012 were 70 years of age or over

## RHA Screening Participation Rates

- Screening rates for women 50-69 years of age

*The Program's goal is to screen 70% of the population of women 50-69 years of age every 2 years.*

■ Number of eligible women aged 50-69  
■ Number of women screened in the past 2 years

**It takes the effort of the entire community to make mobile screening a success. Here are some of the regional highlights for 2012:**

- Compared to 2010:
  - Regional breast screening rates decreased by **3%** (55% to 52%).
  - The population of women 50 to 69 years of age increased by **5244 women** (77,412 in 2010 to 82,656 in 2013).
    - BreastCheck screened **373** more women 50 to 69 years of age (42,452 in 2010 to 42,825 in 2013)
    - The following communities were able to increase their screening rates despite an overall decrease for the city:
      - East St. Paul (R2E)
      - St. Norbert (R3V)
      - Transcona (R2C)
- Access Transcona hosted the first mobile clinic in their community. This clinic was very popular and filled very quickly. Thank you to the staff at Access and to the community for welcoming us so warmly!
